

New Orleans Architect Turns a Dumpster Into a Pool

By Mandy on Jan. 26, 2013 | Topics: [Container Design](#) | [Comments \(2\)](#)

Stefan Beese, a New Orleans-based architect, has dove into an innovative form of recycled design with the “Dumpster Dive DeLux”, a pool made out of a defunct dumpster. You won’t be finding any cool old furniture when you jump in, but it will definitely feel much more luxurious.

The 22’ x 7’ steel refuse container is lined with protective foam insulation and pine wood slats on the exterior. The modular design makes it simple to pack it up and move it to a new location, so you don’t have to worry about leaving your dumpster pool behind if you move to a new neighborhood.

How about putting up a link to the website of the company that designs/fabricates this cool pool. PS: salutations from midtown Detroit's Graphic Arts Lofts!
